

MAGHAV AHUJA

maghavahuja01@gmail.com | +64 228 079079

I am a graduate in Applied Technologies seeking an IT role to enhance my career as a service desk engineer with solid skills. I hold NZ working experience in Datacom as an Intern, and during my internship, I have helped in providing technical support to multiple teams working in the company with passion about delivering exceptional IT support and continuously learning in fast-paced, customer-focused environments.

SKILLSET

Help Desk & Service Delivery: Help desk and remote technical support (L1 / L2), Ticket management, escalation, and service delivery, Client-focused support in multi-client environments, IT operations, monitoring, and incident response

Microsoft & Cloud Technologies: Microsoft 365 (Exchange, Teams, SharePoint Online), SharePoint collaboration and document management, Power Automate (workflow automation), Azure AD / Entra ID, Hybrid cloud and SMB cloud environments

Systems, Networking & Infrastructure: Windows Server 2022, Windows 10/11, Networking: LAN/WAN, VPN, WiFi, DHCP, DNS, Virtualisation and containerisation (Docker), Backup awareness and monitoring, IT documentation and asset tracking

Automation & Business Systems: Workflow automation using Power Automate and n8n, Business systems integration (ClickUp, Trello, Zoho), Python scripting for automation and admin tasks.

EXPERIENCE

Neurix Limited

Auckland, New Zealand

Systems/Devops Engineer (Casual Contract)

September 2025 - Present

- Deliver remote and on-site **technical support** for internal users and engineering teams.
- Ensure stability and efficiency of **business systems, cloud services, and IT operations**.
- Administer **Windows Server**, networking, VPNs, and user access environments.
- Design and implement **automation workflows** to improve operational efficiency and outcomes.
- Maintain detailed **IT documentation**, configurations, and support procedures.
- Support cloud environments (AWS, Azure) and containerised systems.

Datacom NZ

Auckland, New Zealand

Intern (Internship)

April 2025 - September 2025

- Provided **help desk and technical support** in a large, multi-client enterprise environment.
- Supported **Microsoft 365**, Azure DevOps, and cloud-based systems.
- Collaborated with senior engineers and service delivery teams on escalations.
- Built and maintained high-quality **client and internal documentation**.
- Ensured responsive communication and high service satisfaction.

Department of Education, Government of Delhi

New Delhi, India

Graduate Support Specialist

Sep 2022 – Jan 2023

- Supported daily **IT operations** for staff and business systems.
- Maintained asset registers, procedures, and **business documentation**.
- Automated administrative workflows using Python and Active Directory tools.
- Delivered friendly, clear communication and consistent service quality.

Mitre10 MEGA

Auckland, New Zealand

Security Team Member

August 2025 - Present

- Demonstrated reliability, professionalism, and **excellent communication** in a customer-facing environment.
- Built confidence working under pressure while maintaining service quality and values.

PRACTICAL EXPERIENCE (PROJECTS)

Deployment Projects

- I've started deploying existing projects developed using Next.js, React, .NET, Java, Node.js, on AWS and Azure cloud using their free tiers.
- Learning many of the services of the cloud providers which can ease deployment, and automate it.
- Deployed WordPress websites on the internet using cPanel, and other free web hosting control panels.

VPS Server Testing & Deployment – Self-Led Technical Practice

- Procured and configured VPS servers from Contabo, Azure VMs, and EC2 instances, to conduct practical experiments using PuTTY and Linux-based tools.
- Installed and configured web hosting control panels; developed Bash scripts to automate routine server tasks.
- Deployed and managed various specialized servers including torrent hosting, file hosting, and SMTP email hosting.
- Successfully hosted multiple personal WordPress websites to test deployment workflows and hosting performance.

NextCloud - Microsoft 365 Alternative On Premises

- I have deployed NextCloud Files, Office, and other tools equivalent to M365 Personal Subscription.
- I am currently working on deployment of Enterprise level tools from M365 subscription.
- I have plans to make an Azure alternative as well integrated with IAM (Nubus, and KeyCloak) using OpenStack for deploying Cloud Infrastructure on Premises.

Self Learning Platforms

- I am currently practicing, learning the most from KodeKloud for SRE, DevOps, Cloud and Platform Engineering.
- Have gained hands-on experience of working on Linux, and other Devops tools using SadServers and LabEx.io.
- Tools like Terraform, Ansible for IaC, Jenkins for CI/CD, Docker, Kubernetes, Prometheus and Grafana for Monitoring and Logging.

VOLUNTEER

FreeCodeCamp.org – Staff member

Compiled educational resources and gained hands-on experience with Linux virtualization and HyperV.

Shoutcoder.com - Technical Support Analyst

- Provided remote support to **clients** via ticketing systems, live chat, and email.
- Troubleshoot hosting, cPanel/WHM, and backup systems.
- Ensured high levels of client satisfaction and service quality.

EDUCATION

Unitec Institute of Technology

Masters of Applied Technologies (Data Analysis) (Level 9)

- Delivered volunteer **help desk support** for students and staff.
- Supported hardware, software, printers, and user environments.

Auckland, New Zealand

Feb 2023 - July 2024

Maharaja Surajmal Institute

Bachelors in Computer Applications

- Skills gained: Python, Linux, AWS.
- From Python data structures and algorithms to Javascript implementation and use of Linux for deployment.
- Developed a few projects on windows automation and web automation using Python libraries, and bash scripting for linux automation.

New Delhi, India

2019-2022
